WORK

GroundTruth Project, Engineering Volunteer   Present
Building tools to help correspondents collaborate and stay safe at a GlobalPost spin-off partnered with FRONTLINE, NBC News, and others.

Instagram, Front-End Engineer Intern   Summer 2014
Drove front-end work on Instagram's consumer web app. Mentored another intern. Shipped full-stack changes for one-click Facebook login.

Mozilla, Firefox Mobile UI Engineering Intern   Summer 2013
Prototyped systems to save content on the web for later without losing context. Helped bring Firefox Metro closer to production.

bostonsituation.org, Co-Founder   April 2013
Built a 30-person volunteer news organization in a week to counter misinformation about the Boston Marathon bombing in six languages.

Mozilla, Firefox Front-End Engineering Intern   Summer 2012
Bootstrapped the front-end codebase for Firefox Metro, a new browser for tablets running Windows 8, in just 11 weeks.

Codecademy, Volunteer   January 2012
Enabled 40,000+ people to code for the web by writing some of the early JavaScript lessons for Codecademy's Code Year.

Nomic, Product Design Intern   Summer 2011
Designed and prototyped early-stage concepts for a then-stealth startup now funded by Greylock and Sierra.

EDUCATION

Tufts University, School of Engineering, BSCS   2011 - 2015

University of Hong Kong, B. Eng in CS, Exchange   Spring 2014

Tufts Institute for Global Leadership, Program for Narrative and Documentary Practice   2012 - 2013
